EXECUTIVE INFORMATION SYSTEMS  
MOBILE COMPUTING  
CLOUD

#### OVERVIEW

iPLATINUM has been working with Local Government since 2001 and many of our staff have in excess of 25-30 years' experience working with the industry. As a result, we intimately understand the market, including the Council environment, IT systems, data structures, business processes and the core vendor offerings in terms of product and delivery approach.

We note that many councils struggle to get full value from their investment in corporate IT solutions. This may be attributed to poor quality data, an incomplete view of corporate data, limited access to historical information and a variety of other matters.

iPLATINUM offer a range of services and products aimed at overcoming these issues and helping councils gain maximum return on their investment in IT. This may range from an engagement to review and make recommendations on data quality improvement, data migration plans/strategy, data migration projects and data archiving.

Some of the services on offer from iPLATINUM designed to overcome the abovementioned issues include:

- Data Cleansing
- Name and Address de-duplication
- Data Migration Strategy/Planning
- Data Migration including extraction, transformation and loading
- Data Archiving of historical information

#### DATA SERVICES OFFERING

**Data Cleansing**—iPLATINUM can provide services that will improve the quality of your corporate information and eliminate redundant data to optimise information access.

Techniques developed over many years whilst working with multiple councils have enabled iPLATINUM to automate and optimise this process.

**Name and Address De-duplication**—We are specialists in the area of Local Government land information systems and property and rating information. iPLATINUM has developed solutions that enable us to automate this process and provide council with significant outcomes in a limited timeframe.

**Data Migration Strategy/Planning**—defining high-level scope of the data to be migrated, key considerations and recommendations for the planning of the data migration, and resource responsibilities, inclusive of considerations in regard to data cleansing and the management of data that may not be migrated ie. An archiving strategy.

**Data Migration**—iPLATINUM offers a complete data migration service including but not limited to project planning, scope and initiation, data design, definition and mapping, configuration of migration environment, extract, transformation and load, testing and validation.
